BEGINNERS GUIDE TO BASIC DIXIELAND TUNES

Preface

The purpose of this book is to perpetuate Dixieland Jazz by providing a practical tool that you can use to learn the music, in a format you can use in performance. It includes all the basic tunes, plus classics known and less-known, and some practical tunes you might play on hotel gigs. You'll be able to play with commercial bands, or even start your own band.

The notes and chords are taken from a wide variety of sources, including the original records. The object has been to make the sheets as authoritative as we can, and as feasible relate them to recordings so you learn tunes by playing along.

Published fakebooks, eg. Hal Leonard's excellent "Ultimate" series, have many "pop" dixieland tunes, but they often have more modern chords, and the few multi-strained classics have only the melody strain. "Sheet music" collections are useless on the bandstand. A succession of "under-the-counter" fakebooks by musicians have helped sustain the music, but are hard to find, and neither their notes nor chords are authoritative; no "legal" fakebooks been published.

Phrasing--The tunes as published frequently had phrasing very different from the way bands actually play them--ie, originally square phrasing typical of 1920s music usually is played swingy--so you must learn to hear the tune's melody but play it in the phrasing style appropriate to the tune, or to the band you're working with. When you can do that, you have taken the first step in "faking"--improvising. In most cases, two 8th notes are played sort of like a dotted 8th and a 16th, but not quite; here, a succession of dotted 8th-16th combinations is written as all 8th notes.

Tempo values--Each sheet has a tempo value; it should be taken as a starting point until you have specific reason to change it. Vocal tunes are played somewhat slower as vocals than as instrumentals; as sing-alongs even slower. Instrumental tunes (ie the multi-strained tunes) are usually faster. Try singing the tune; usually don't play it any faster than the words are comfortable. Another benchmark is the tempo at which the tune is most effective as a *dance* tune. *Virtually all tunes have a segment of several bars where playing the correct tempo is crucial: too fast and the melody or lyrics feel hurried, too slow and the passage drags; the best tempo for the passage is the best tempo for the tune as a whole.* Most tunes should "swing", some should "rock"; I think all should make the body want to *move*!

Basically this is rompin' and stompin' music, but *Slow tunes* can maintain the feeling: curiously, on miscellaneous public gigs, the greatest, often the only, applause, is more often for slow tunes, such as "Do you know what it means to miss New Orleans" played very expressively, or "Basin Street Blues" played very rhythmically, not the virtuosic killer-dillers. Some slow tunes are more suitable for expressive playing than others--those that *make* you wail probably will get the most audience response...

I feel that all but concert gigs should be played as dance gigs; do that and the music more likely will be most effective, ie. have the greatest impact on the audience. When playing tunes in

Concert situations, if you want to play at “virtuoso display” tempos, that’s cool: your function is to be you...But good body-movement tempos probably will get the most response. When planning sets for any type of gig, the best mix makes various parts of the body move, the whole body move in different ways, and occasionally sparks cheers at virtuosity. Study the performance notes, find the precise tempos that make you and your colleagues bounce, groove, swing and stomp the hardest; make lists of tunes that produce the same results; make set lists that mix maximum variety; do it all over again.

There are two main types of improvising: 1. Playing variations on the melody: You have the melody and chords in your head, and you add notes, change the phrasing, etc. 2. Creating something new over the chords. Some musicians who know at least bits and pieces of many tunes enjoy quoting melodies or famous solos during their solos; sometimes the other musicians pick up on this and go ‘round and ‘round until they run out of quotes; that’s not improvising, but it can be a lot of fun and grab audiences.

Some of the classic records play the melodies quite differently from the published music. There seems to be no “definitive” version. On some tunes the classic record has so many variations of the “melody” that all one can do is suggest a workable approximation; in some cases the record was the only source available. Sometimes, we simplified the melody and chords for playability.

Note that some tunes have the VERSE and CHORUS. When you see “CHORUS” at the beginning of a tune, the VERSE is at the bottom. Usually *the verse is optional, but sometimes it is a standard part of the tune as usually played*. I tried to include the verse if it has a significant melody, and indicate when it is usually played.

Most of the tunes are arranged in straight alphabetical order; ignore apostrophes in contractions—all the “I” tunes are together, as are “If, I’m, I’ve”, in that order. However, a few tunes take up only half a page or less, so to save space, I’ve put most of them on 2-3-tune pages, and some are added on to two page tunes. Some tunes are out of alphabetical order to enable the pages of 2-page tunes to face each other. The tunes out of order are italicized in the Index.

Playing Dixieland

Rhythm playing is the main subject of this essay, though there are a few notes at the end for the horns. Old music has its own rhythm styles, just as modern jazz and rock do. And if any of the rhythm players barge ahead and do their own thing, they can destroy the impact of the music, even take all the fun out of it for everyone else in the band and audience. They aren't teaching old-style rhythms in school at any level, so the teachers don't know them either.

Younger rhythm-folk and anyone else who doesn't know the music, *Hear This*: In old music, the rhythm section sits *behind* the horns, both physically and artistically. Your job is to make the horns sound good and the dancers groove the roof. You are the *rhythm* section; unlike modern jazz and pop players, you are *not equal* to the horns. You provide, *appropriate* rhythm, strokes, and chords. *KISSS method--Keep It Simple, Solid and Soft--Yes, S-O-F-T*: the *horns* control the *volume* dynamics--you follow them and make sure you don't play louder than they do!!

Before you stroke a lick, notice the instrumentation. In fact, when you get booked, ask the bandleader about the:

- Instrumentation in the band.
- Rhythm style he/she/it wants.
- Repertoire being played.

Now, figure out what kind of strokes you are going to use. That is, will the *bass* or *tuba* play 1&3 or 4-4; will the *piano* boom-chuck, do mainly right-handed zaps, stride, or ricky-tick all night? Will the *drummer* ride the big cymbal or do brushes or go b-o-o-m chick or do "4-on-the-floor" bass drum, or play a lot of press rolls? ---> If there is a *banjo*, the drummer should stay off the ride cymbal; use nice whacking brushes with the guitar for non-slow tunes. Listen to what the horns are doing as a group or individually, and support them; if they are syncopating, play straight 4--it'll send their notes flying into the stratisphere. *Banjoes* and *guitars* can play a powerful dynamic role simply by proper choice of chopped 4-4, off-beats, or held strokes. Zaps and solos are part of the fun of playing dixieland; but comping is an art, and a worthy rhythm person knows how and when to comp; knows how to play the various rhythm styles; can feel whatever style is being played; and supports the effort by playing appropriately. The rhythm section

- is a unit: a good one liberates dancers;
- is unnoticed by horns because they are so comfortable they are playing above their norm;
- is so unified that the individual instruments well might barely distinguishable to listeners; maintains a balance of sounds.

Routines

Verses: Most old songs had a *Verse*. The verse may or may not played in a particular tune depending on tradition; it's usually before the melody (first) chorus, but often may be played after the melody, and often is played again before the out choruses. EG. Verse-Chorus-Solos, Chorus-Verse-Chorus-Solos, Chorus-Verse-Solos-Verse-Chorus.

Endings are usually more or less at the whimsy of the lead horn, but there are some tunes with well-known endings. *Standard patterns*: Any tune may have 1 or 2 "out" choruses. "Traditional

jazz" bands end multi-strained tunes with a 2-bar extended or "double" ending, using the same chord, inserted between bars 31 and 32 (23 and 24 for blues, which are usually played 2 X per strain); and may use double endings for anything fast. However, the piano-bass / *Eddie Condon* style bands often use the *drum tag* pattern: Sudden ending, 4 bars drums (maybe 8), 4 bars (maybe 8) band tag. Dance band or jazz horn players often use the I / VI ending. Routines vary from band to band, depending in part on which, if any, classic version of the tune is being copied.

Breaks and Stops are very important in traditional jazz. Rhythm is silent or plays a specific beat pattern ("stop"), while a horn solos. You ZAP the first note of the break. Some breaks (*Tiger Rag*) and stops (*Dippermouth Blues*) are standard parts of the tune; others are part of a band's arrangement, or are called ad hoc by a horn, or even rhythm person: > - - - or >>> - or - > - > (- is a tacit beat; > is a band zap on the beat). If played with authority, they really zip up the tune and make it more fun to play. Be prepared to take a break of one or two bars without advance warning--someone may turn around suddenly and point to... *you*. A nifty break by a newcomer is most impressive. They may be testing you.

Dynamics are very important. Volume well might vary from strain to strain or chorus to chorus. If there are 2 band "in" choruses, 1st is "up", 2nd is "down" ; if 2 out choruses, 1st is down, 2nd is up. Or vice versa. A great effect is to drop the volume of bars 17-23 in the out chorus, then really hit the last 8 bars. Many lead horns, especially in small formats, open and close with the melody, playing it "down". Some consistently play a hot out chorus. Follow the leader !!

1920s pop tunes. This is "square" two-beat music. *Piano* mostly boom-chucks, or syncopates as a change-up. *Banjo* often plays 2 - 4, changing-up with a 4 - 4, gliss, or occasional mummies stroke. *Tuba / bass* mostly does 1- 3. *Drums* use *bass* on 1 - 3 , *snare* on 2 - 4, with frequent zaps on *choked* 6", 8" or high-hat cymbal. Chords often change in 3 beat cycles (the usual is 4 or 2!!) Eg: C..G7 ..C. This pattern is not used much in Dixieland, but if you ever play the original stock charts or in the 20s style, you'll need to practice it.

The Horns Many of the general comments on the music apply to the horns. Here are some considerations for the front line. *Style is important*. Dixieland played by modern jazz players, no matter how good they are, usually sounds like hell because Dixieland isn't Bebop: it isn't "cool", it's "hot". This statement is directed at *you* as an individual, playing with a group of traditional style players. Of course, if the other players are beboppers, the music may be great--But it ain't Dixieland and if your audience--the ones paying the freight--expects Dixieland, the folks may be disappointed. As a minimum, you should be able to play 30s swing-style, without extended chords, with a warm, not "cool" sound.

Solos: The traditional New Orleans style featured *ensemble* playing, with very few solos, except in breaks. However, most bands structure the performance of each tune with one or two ensemble choruses going in, maybe chorus-verse-chorus, or verse-chorus, a string of solos, one or two out ensemble choruses. It all-too-rarely occurs to the musicians that the same routine tune after tune can be b-o-r-i-n-g to the audience. Even when the performance is varied with more or less fancy arrangements going in or out, the solos remain.

Consider this: do you really have something interesting to say or hot licks or fancy gimmicks for

every tune? Sure, you have fun soloing, and of course some of your best moments come from the stimulation of what's happening at the moment. But if you find you feel no inspiration during a tune, why not pass on it rather than bore the audience? It seems that most of the time, the rounds of solos occur in mindless cycles. This isn't so bad for fast tunes, but a lower tempos, especially slow tunes, it makes the tunes drag on and on. Try splitting up the solos into 16- or even -8 bar segments. Harmonize with other horns behind the solo. As a listener, I really don't get much pleasure from 9 choruses of "Georgia"--4-5 will do just fine...

Liberal use of mutes provides a great change-up in the sound of the band--the brass can do straight or solotone mute harmonies behind the clarinet, or use the mutes during ensembles.

Dixieland styles:

There are several basic styles. 1. New Orleans traditional, 4-beat, usually neither "fast" nor "slow", and features much ensemble playing. 2. The most commonly played style is New York/Chicago/Eddy Condon, piano-bass-(guitar), which essentially is a form of 4/4 swing, has a greater variety of tempos and tunes, from slow to hot/fast, features rounds of solos. 3. "Ragtime", which is square and not played that often for entire gigs. 4. 1940s New Orleans "Revival", hard square 4-beat. 5. West Coast "Revival", 2-beat (banjo-tuba), not "fast".

Tune sources: CDs and music books

If you intend to play Dixieland regularly, listen to the old records. There are many CDs of just about everything you'd need. The original *Audio Fidelity* "Dukes of Dixieland" records (to date only one CD has been issued) have all the cliches and patterns, and are great learning tools. Turk Murphy (well represented on CD) did all the trad and saloon tunes. The *Stomp Off* label has current bands playing 20's jazz. Robert Parker's CDS label stereoizes many basic 20's and 30's records; John R. T. Davies' "restorations", which are found on many CD labels, seem to get the most sound out of the 78's.

The best learning tool is a tape recorder under your chair recording every performance, rehearsal--every time you play. Listen to it as soon as you get home, to hear what was right or what you screwed up--what didn't fit and what made the band sound better--while you still remember the gig and what you were thinking while you were playing. This is the quickest way to become useful in a band or solo context. Don't let the bad stuff get you down; look for what's right and practice it; note what to avoid in the future, so you don't get into any bad habits. Do use your tapes for reality checks--new players and bands usually don't know when they are playing well or badly. Even experienced musicians have times when a performance felt good and was actually terrible...

Remember: You're there to entertain the audience. As an individual, you are there to make the band sound better, and make the client want to have the band for his/her next event. You never know who's in the audience, so always conduct yourself in a professional manner, on and off the bandstand. If you're playing with the band for the first time, check with the leader from time to time to see whether he wants you to play more or less conservatively.

Have fun, break a leg, and *vaya con dinero*.

Chorus

[Main melody begins here. SOLOS are played on Chorus. Check below for VERSE; sometimes the Verse is played first; Intro may be above the Verse. Sometimes Chorus is played first, then Verse, Chorus (or solos), Verse again after Solos. It's usually optional, except for tunes that are classic set pieces.]

Verse

[Some verses are considered "part of the tune" because they are on the original record; most are optional add-ons. They do add to the variety of the tune. If the verse has no particular musical or "classical" value, I've omitted it.]

A [Many classic tunes have several strains, labelled A, B, C, etc. Each strain may be in a different key. They are all part of the tune. They may or may not repeat. Sometimes it's neat to go back to the top after the solos, which usually on the last strain.]

B [Breaks are an important feature of Dixieland. A BREAK is a SOLO passage. Band or Rhythm hits the first beat chord sharply, soloist improvises something. Breaks may be played during solo choruses or just the in and out choruses. Usually it's a matter of local convention, except in some classics.]

Dogfight [Usually an introduction to a key change that gets you into the modulation.]

Interlude [A passage between strains.]

C Solos [Usually the entire tune is played "as written", then you find the strain on which you play solos. Usually it's the last strain. If it's not the last strain, you'll usually play some other strains, then go out. If it is the last strain, you'll usually play a melody chorus, one or two "jam" choruses, go out with an extended improvised or pre-set ending.]

Ending [Usually, an ending is added onto the tune. Multi-strained tunes usually use a "Double" or "Extended" ending that begins 2 bars before the end and extends 2 bars more. When used with Coda sign, a non-standard ending begins before the usual end of the tune. "Ending" is used to identify non-standard endings. See "Tag" below.]

Tag TAG has 2 meanings: 1. a standard pattern where the tune stops suddenly, DRUMS play 4 (sometimes 8) bars, Band plays 4 (sometimes 8) bar ending.
2. an additional 1-8 bars, usually pre-set. It could have been labelled "Ending", but "Tag" is commonly used so get used to the term.]

"ROUTINE:" Instructions are usually self-explanatory, but note that an instruction such as A A, B B, A, C C ignores Repeat signs.

Last X to TAG

The musical score is written on a single staff with a key signature of one flat (Bb) and a 4/4 time signature. The tempo is marked as 180 beats per minute. The score is divided into several sections: an introduction, a chorus, and a final section labeled 'Last X to TAG'. Chords are written above the staff, and some measures are marked with 'Offbeats' or 'Band 4-beat'. The score includes various musical notations such as eighth notes, quarter notes, and rests.

The standard version is Turk Murphy's, esp. the vamp & verse, which differ from the record; we use Turk's for playing, Armstrong's is appended. The chorus is Armstrong's, the verse notes are only approximate: there seems to be no "standard" version.

1. In the cafes in town, you are known as a clown
 how happy you seem to be. But in
 Back of the smile, there's a tear all the while,
 and heartaches that no one can see. For the
 Life that you lead isn't real, well my friend, I know just how you feel.

2. Well, my friend, don't you know, that your life is a show
 you'll wake up some day and find, it's too
 Late to return, though your poor heart will yearn
 for the real things that you left behind.
 For each moment you're smiling and gay,
 there'll be hours of sorrow some day.

This page contains ten staves of musical notation for a piano exercise in G-flat major. The notation includes various chords and melodic lines with triplets and slurs. The chords are: Fm7, Bb7, Eb, G7, Cm, F7, Bb7, Gdim, C7, Fm, Ebdim, Eb, C7, F7, Bb7, Eb. A box labeled '12' is present on the eighth staff.

The classic version of this fine tune (first introduced by ODJB) is by Frankie Trumbauer's band, featuring solos by Tram and Bix--Routine: Intro, Tram solo, Bix solo, melody. Eddie Lang's guitar accompaniment is also a classic example of the genre. You can extend the tune by playing melody first, add solos, play melody and a jam chorus out.

Chorus

Chorus musical notation in F major, 2/4 time. The melody is written on a single staff. The key signature has one flat (Bb). The time signature is 2/4. The melody consists of 8 measures. The first measure is a half note F. The second measure is a half note G. The third measure is a half note A. The fourth measure is a half note Bb. The fifth measure is a half note C. The sixth measure is a half note Bb. The seventh measure is a half note A. The eighth measure is a half note G. The key signature changes to F minor for the last two measures, which are F and G.

Chorus Chords: F, F, C7, F7, Bb, Bbm, F, G7, C7, F

Verse

Verse musical notation in F major, 2/4 time. The melody is written on a single staff. The key signature has one flat (Bb). The time signature is 2/4. The melody consists of 8 measures. The first measure is a half note F. The second measure is a half note G. The third measure is a half note A. The fourth measure is a half note Bb. The fifth measure is a half note C. The sixth measure is a half note Bb. The seventh measure is a half note A. The eighth measure is a half note G. The key signature changes to F minor for the last two measures, which are F and G.

Verse Chords: F, F7, Bb, F, G7, C7, F7, Bb, F, G7, C7, F

ROUTINE: *Varies. Play Verse as dirge, in tempo, or solo rubato. After solos, you can play in F, modulate to G, Ab, Bb, C. Soloists often play other tunes Red River Valley, She'll Be Coming Around the Mountain, etc. etc. Try it in F minor. 4-bar drum tag, 4 or 8 bar band tag (eg. last 8 bars of Chorus)*
Some audiences have a tradition of marching around in a line; it's great if the horns and mobile rhythm players can jump up and lead them around.

When You Wore A Tulip

Give My Regards To Broadway

A common convention theme is red, white & blue "Patriotic" or "Party Convention". Any Cohan tunes are considered appropriate, but they hired a Dixie, not a brass band (which would play Sousa marches, etc.) so you can mix these tunes in with familiar Dixie tunes.
